PROJECT DESCRIPTION

LIFE AQUOR began in September 2011 and it'll finish in May 2015.

It was conceived as a demonstration activity to foster a reversal of the current trend of groundwater overexploitation and to increase the hydro-geological recharge rate of aquifers. The purpose is to restore the groundwater balance in the Vicenza Upper Plain and to ensure the sustainable use of this resource by current and future generations.

The initiative is based on the active involvement of stakeholders and it aspires to consolidate a shared commitment to the quantitative protection of the upper Vicenza's plain, this is one of the most important groundwater reservoirs in Europe.

PARTNERSHIP

- Provincia di Vicenza
- Acque Vicentine Spa
- Alto Vicentino Servizi Spa
- Consorzio di Bonifica Alta Pianura Veneta
- Consorzio di Bonifica Brenta
- Centro Idrico Novoledo
- Veneto Agricoltura

COMMON GROUND

Requalification of the hydrological environment and restoration of the groundwater balance.
