PROJECT DESCRIPTION

LIFE Rinasce Project , promoted by Central Emilia Reclamation Consortium in collaboration with the Emilia - Romagna Region, has the overall aim to show that the key concepts of the Water Framework Directive 2000/60 / EC and the Floods Directive 2007/60 / EC, may also be applied on the artificial water network, reducing the risk of floods and at the same time improving the ecological status of rivers. In this sense we will be experimented types of intervention to apply these concepts to the particular situation of drainage canals.

PARTNERSHIP

- Consorzio di Bonifica dell'Emilia Centrale
- Regione Emilia Romagna

COMMON GROUND

Hydraulic-environmental requalification and improvement of the ecological condition of water streams

NETWORK ACTIVITY

Share visibility in respective project web sites.

Participation to the IV Italian Convention on Fluvial Requalification, that took place from the 22nd to the 26th of October 2018, in Bologna. During the Convention, some representatives of the LIFE Risorgive Project examined the principles of fluvial requalification on Italian territory and shared technical information with the representatives of the projects LIFE Rinasce and LIFE Rii.
